Dr. Donna Leake, *Superintendent*
Carole McCombe, *Principal*

March 2026

Dear Parents and Staff:

The administration of Eastford Elementary School would like to notify you that radon testing will be conducted between March 4 and March 6, 2026. According to Connecticut General Statute Sec. 10-220(d), all public schools must inspect and evaluate the indoor air quality in school buildings every three years. This required inspection and re-evaluation of indoor air quality includes evaluation of radon gas.

The purpose of the re-evaluation of indoor air quality is to determine if air quality has changed in the past three years.

Fuss and O'Neill, Inc. will conduct the three-year radon re-evaluation of the school building. To re-evaluate buildings for radon in air, a limited number of locations are selected. Small test devices containing charcoal will be placed in ten percent of the occupied rooms that are in contact with the ground. Radon test devices are safe and do not cause any adverse health effects. These devices will be left in place for two school days.

The school administration will keep radon test reports on file and inform you of test results and interpretations when all testing has been completed. If elevated levels of radon are found, steps will be taken to reduce radon levels below the United States Environmental Protection Agency action level of 4.0 pCi/L.

Please read the enclosed educational pamphlet describing radon and the school testing program effort. If you have any concerns regarding radon testing, please feel free to contact the State of Connecticut Department of Public Health Radon Program at (860) 509-7367.

Sincerely,

Donna P. Leake

Donna P. Leake, PhD
Superintendent of Schools
